Welcome

Dear Colleagues,

The situation of the COVID-19 requires a review of the organization on a day-to-day basis, both in our usual work than in the planned meetings. Therefore – as you will easily understand – we have taken the decision to postpone the international intracellular bacteria meeting once again, to August 23-26, 2022, at the CHUV in Lausanne.

This meeting is a joint meeting between the **ESCCAR meeting** (European Society on Chlamydia, Coxiella, Anaplasma and Rickettsia), that was held in Marseille in 2018 and the **meeting of the European Society for Chlamydia Research**, that took place in 2016 in Oxford.

The meeting is co-organized by the ESCCAR board, the European chlamydia board and the American rickettsial society. It is also supported by the ESGMD (genomics and molecular diagnostics) and ESMAC (mycoplasma and chlamydia) groups of ESCMID (European Society of Clinical Microbiology and Infectious Diseases).

As usual, we will have dedicated sessions and talks on various aspects including epidemiology, genomics, cell biology, molecular biology, diagnostics & infection management of a variety of bacterial agents, including Anaplasma, Bartonella, Chlamydia, Coxiella, Ehrlichia, Rickettsia, Waddlia and Wolbachia.

Looking forward to welcoming you in Lausanne.

Best regards,

Professeur Gilbert GREUB, MD-PhD
Institute of Microbiology, UNIL-CHUV, Lausanne
